Wakulla	6,814	0	4,845	Most Irma-Related Outages Restored*
Total	1,768,021	19,102	1,929,332	

We are still on track for restoring essentially all customers in the severely impacted areas of Hardee, Highlands, Lake, Polk, Volusia counties and the northern Orange and Lake County border area by 11 p.m. Tuesday night. In many instances, we are rebuilding the electrical system as a result of significant damage. We will continue to work crews in these hard hit areas, and all across Florida, cleaning up any isolated and scattered outages until all customers are restored.

This does not mean we will have restored 100 percent of all customers. We will continue to work to restore isolated and scattered outages, including customers who cannot receive power due to damage to their meter boxes. We will continue to keep our resources in these areas to work on cleaning up any isolated and scattered outages until all customers are restored

**We are 99 percent complete with Irma-related outages in these counties. Crews will continue to work until all remaining, isolated and scattered outages are restored. In some cases, service may be delayed in areas impacted by tornadoes, heavy tree and debris damage, and where a meter or other customer equipment was damaged and requires repair and an inspection.*

****Note: Outage numbers may fluctuate as restoration efforts continue and new outages are reported not related to Hurricane Irma.*
